Case Log for the Certificate of Small Animal Veterinary Practice / Dentistry

Case log explanations and instructions:

100 patients are required.

Clinical Category

One patient may undergo several clinical categories. Each category needs to be filled in as a case separately. Example: cat with gingivitis, fractured 104 and 307 308 affected by TR2 underwent: prophylactic procedure, endodontic treatment of 104 and crown amputation of 307 308. Each of these 3 categories needs to be logged and described separately.

1. **OS** Oral surgery which includes: nonsurgical extractions and crown amputations, surgical extractions, oral fracture repair, major oral surgeries and soft tissue surgery
2. **PE** Periodontology with: COHAT, Subgingival debridement, Pocket reduction (gingivectomy, gingivoplasty), Surgical periodontology: flaps, GTR
3. **EN** Endodontics with Conventional endodontics, Vital pulp therapy and surgical endodontics, Restoration performed after endodontic treatment is a part of endodontic procedure
4. **OR** Orthodontics: Orthodontic consultation, Interceptive orthodontics, Passive and Active orthodontic treatment
5. **RE** Restorations and Prosthodontics that include dentinal bonding, restorations and prosthetic treatment
6. **OM** Oral medicine: extended imaging diagnostics, treatment plan, in vitro procedures, tests

In the case log the following rates of categories are required:

OS-45% with maximum half of simple extractions and crown amputations
PE-35% with maximum half of COHAT
EN-5% with at least half being a standard endodontic procedure
RE-5%
OM-5%
OR-5% with maximum half of orthodontic consultations

Patient: needs to have name of the animal and surname of the owner (the latter non mandatory due to personal data protection)
Species: Dog, Cat
Age: expressed in years and months
Primary complaint: highlighting main reason for coming to surgery or major findings which made recommendation for dental procedure. It also can be referral case with main request from referring veterinarian
Diagnosis: must include all relevant dental findings after clinical and radiographic examination (if applicable) with the use of abbreviations (Appendix 1)
Dental Procedures: must include all performed dental procedures adequate to diagnosis column. if a part of problems postponed or declined - please note this.
Follow-up: note the time after the procedure you did the recheck exam and findings, for endodontic treatment - 6 months follow up are required

Example how to log cases/categories:

Case #	Clini-cal Cat.	Patient	Species/ breed	Age	Primary Complaint	Diagnosis	Dental Procedure	Follow up
1	OS	Chelsea Smith FS,	Dog/boxer	6yrs 8 months	bad breath,	PD3 109, 110/ 310	XSS 109 XS 110, 310	
2	EN	Chelsea Smith FS,	Dog/boxer	6yrs 8 months	pain on retrieving	CCF 304	RC 304	
3	RE	Marcel Jackson	Cat/British shorthaired	4 yrs	oral mass	Granuloma - MAL/1 traumatic relations of 108/409	odontoplasty of 108, dentinal bonding	6 weeks re-check: reocur-rance of granu-loma - recom-mended extrac-tion of 108

The case log needs to be compiled as an Excel file using the template in the appendix.
